Re: Lake Chelan Hydroelectric Project No. 637 (Project)  
Appendix D 401 Water Quality Certification Condition V.C.i)  
Water Temperature Data Reports: 2014 Quarter 3

-----  
-----

Dear Ecology Water Quality Program, Chelan River Fishery Forum and Other Parties:

Water temperature monitoring data for the 3rd quarter 2014 (July - September), 2014, are provided in the attached files. Please note that the temperature logger at the End of Reach 1 was apparently broken off and washed away during the spill season. The metal post holding the logger housing was broken off at the river bed and located just downstream from its position, but thus far we have not found any sign of the temperature logger. In past summers, water temperatures measured at the End of Reach 3 have been close to the temperatures measured at the End of Reach 1 with a time lag, with the daily maximum typically only slightly warmer during hot days. A new temperature logger was installed at the End of Reach 1 on August 13, 2014. Also, please note that the automated temperature sensor in the tailrace, located on the intake screens for the Pumping Station, failed on April 14. The tailrace water temperature data is also represented by the logger located at the edge of the shoreline at below the Pumping Station. The automated sensor was returned to service on August 20, 2014.

This information will be posted to the Lake Chelan Implementation web page under resource documents.

Please feel free to call or email any questions or comments.

Steven Hays  
Fish and Wildlife Senior Advisor
