Re: Lake Chelan Hydroelectric Project No. 637 (Project)
Appendix D 401 Water Quality Certification Condition V.C.i)

Water Temperature Data Reports: 2014 Quarter 4

Dear Ecology Water Quality Program, Chelan River Fishery Forum and Other Parties:

Water temperature monitoring data for the 4th quarter 2014 (October - December), 2014, are provided in the attached files. As noted in the 3rd Quarter report, the temperature logger at the End of Reach 1 was apparently broken off and washed away during the spill season. A new temperature logger was installed at the End of Reach 1 on August 13, 2014, using an old mounting post at the edge of the shoreline. In the past, this edge of shoreline location has been compromised by apparent upwelling of hyporheic flow which does not follow the daily and hourly water temperature fluctuations during the fall. This apparently was also the case with the data reported here, which shows water temperatures at the end of Reach 1 that are warmer than would be expected during this time of year. A new, more robust, mounting post was installed recently at this location away from the shoreline and future data will not be biased by hyporheic flow.

This information will be posted to the Lake Chelan Implementation web page under resource documents.

Please feel free to call or email any questions or comments.

Steven Hays
Fish and Wildlife Senior Advisor
