INTRODUCTION

This document contains photographs of tributary mouths taken in March 2008. These tributaries are primary candidates for removing barriers to upstream fish passage, primarily to Westslope cutthroat trout, through the Tributary Barrier Removal Project. These photographs are intended to provide Lake Chelan Fishery Forum members with updates to existing conditions at tributaries surveyed during the Tributary Barrier Analysis (2000) and Fisheries Investigation (2000) studies that were conducted as part of Lake Chelan relicensing baseline studies.

FIRST CREEK

FISH CREEK

GOLD CREEK

GRADE CREEK

MITCHELL CREEK

PRINCE CREEK

RAIL ROAD CREEK

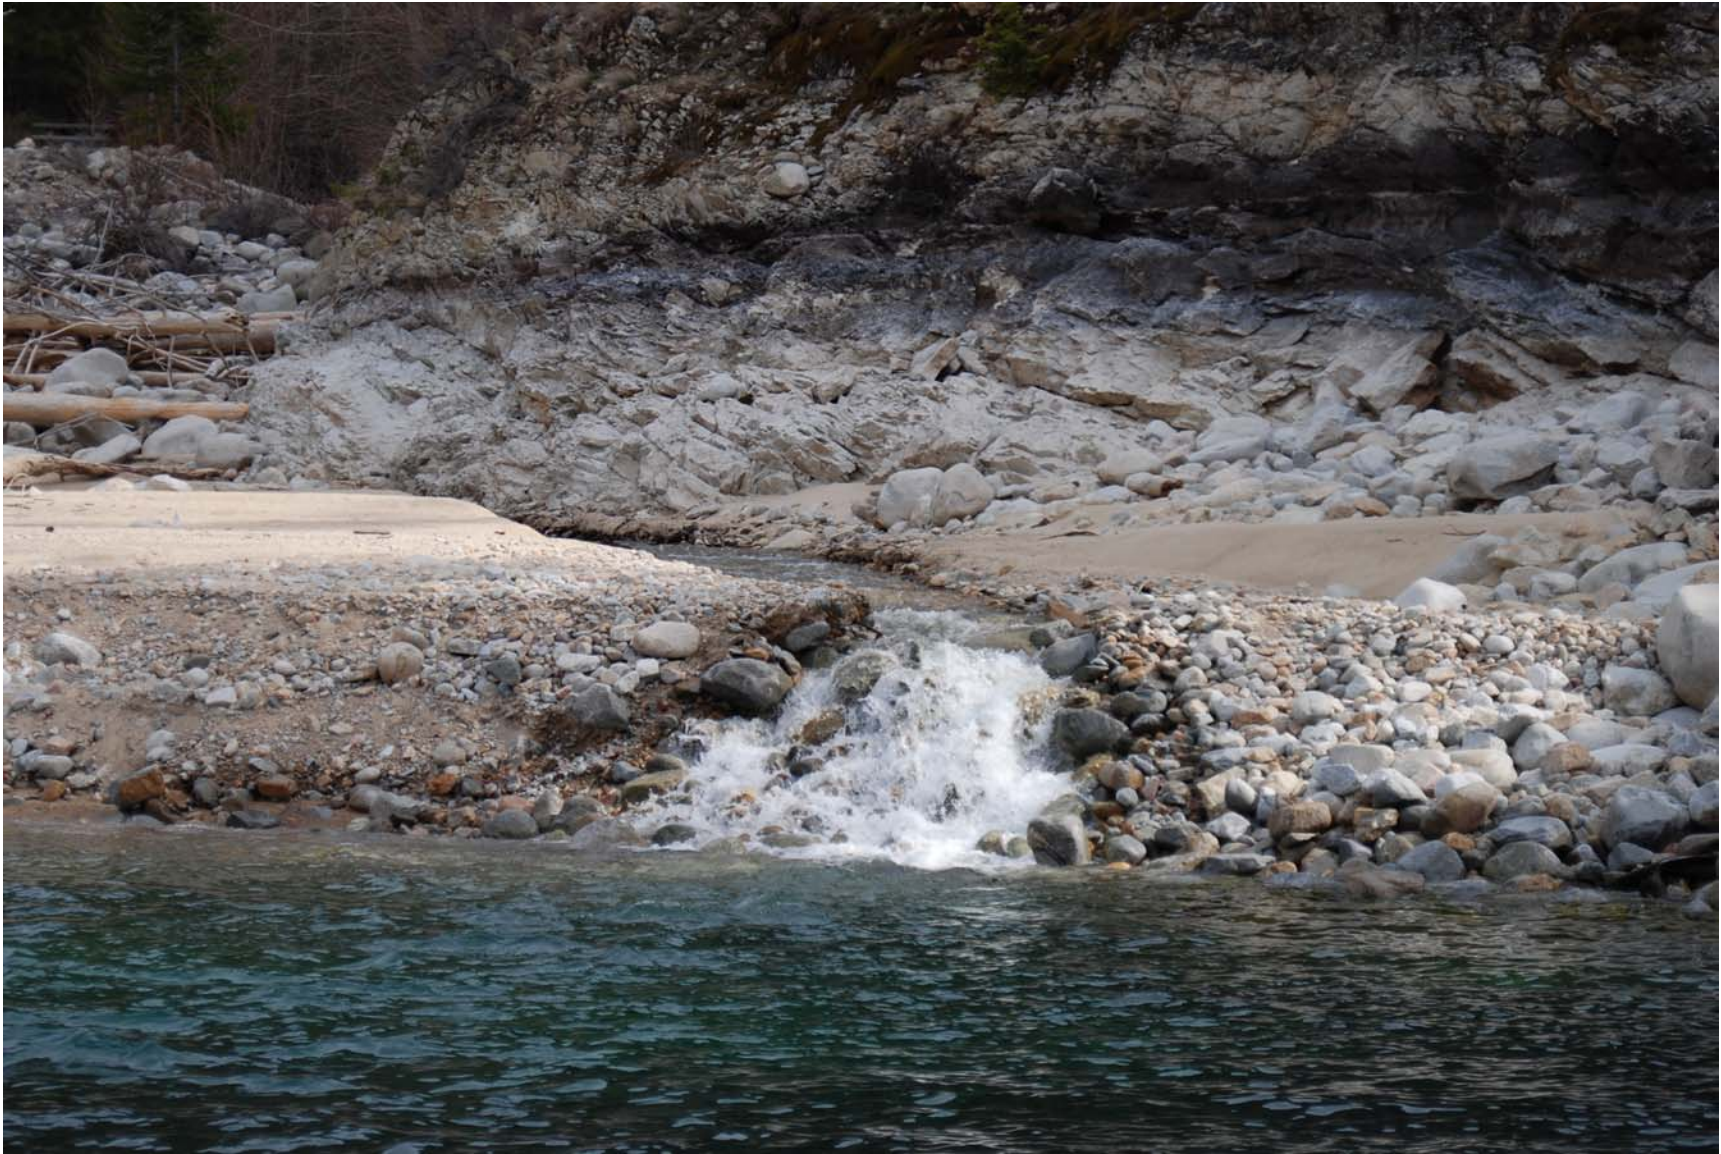

SAFETY HARBOR

TWENTY-FIVE MILE CREEK
