ELECTRIC LINE EXTENSION POLICY

Revisions support application processing for HDL & Cryptocurrency loads

- Separate pre-design & engineering stages
- Additional load data disclosures
- Property-owner permission required

Revisions aligning policy with practices recommended by Customer Service

- Increase flexibility for line extension Estimate payments
- Cancel incomplete application after 30 days
- Clarify applicant roles/responsibilities
- Better define when various fees are due

Utility Service Regulations

- Remove references to Rate 35 and replace language with load types: Cryptocurrency & High Density Loads in the following sections:
 - Changes in Electric Load
 - Combined Residential and Commercial Service
- Revise backflow assembly tester qualification requirements
