CHELAN - You're invited to a community update about building a new substation between Chelan and Manson on Tuesday, October 24, 6-8 p.m., Chelan Fire Hall, 232 E. Wapato Avenue, Chelan.

The PUD and some of your neighbors have been looking for a location for a new substation between Chelan and Manson. A substation is needed for additional capacity to support expected commercial and residential growth during the next decade. The last time a substation was built in the area was 1980.

Please join us on Oct. 24 for an update on finding a location for the new substation.

If you can't make the Oct. 24 meeting, we will email an update to everyone on our distribution list. If your neighbors aren't receiving our emails, please have them contact me.

The latest information about the project can be found on our website, including a map of the two sites under consideration.

The PUD encourages public discussion. You can share your comments using the public comment form on our website, www.chelanpud.org, by emailing teka.sellers@chelanpud.org or calling (509) 661-4294.
