

North Shore Chelan Substation

Legend

- Transmission (Yellow dashed line)
- Wapato (Yellow solid line)
- Possible Site Areas (Red circle)
- City Limits (Pink shaded area)

1 in = 0.12 miles

Dashed lines are underground distribution and solid lines are over head distribution.

Mid-line – location where circuits from Wapato (green lines) and Union Valley (blue lines) substations meet – considered the “load center”.
