WHAT:
Chelan County PUD is rebuilding approximately 1,700 ft. of overhead power lines and 400 ft. of underground power lines south of Railroad Ave. in Cashmere. The project includes pole replacement and installation of new electrical wire. Some poles will replace existing poles and others will be removed depending on right of way, easements and design parameters.

WHY:
To upgrade and replace aging electrical facilities. The upgrades will increase reliability by reducing restoration time during power outages.

POWER OUTAGES:
• Short-term power outages may be needed
• Affected customers will be notified about the schedule and duration of the outage

SCHEDULE:
• Work will begin during the last two weeks of December and continue through mid-January
• Working times are generally Monday through Friday, 7:30 a.m. to 3:30 p.m.

THINGS TO KEEP IN MIND:
• Watch for lane closures and flaggers
• Large excavation equipment and power tools will be used
• Access to homes and driveways will not be affected
