

Rocky Reach and Rock Island 2007 Spill Plan Overview

Set the Stage

- HCPs set initial spill levels at RR and RI
- Allowed for planning and strategy development
- Test window closes in 2013
- Spill is a “tool” to reach goals
- Each species requires different tools
- Each facility supports the use of different tools
- Some facilities require more spill – some less
- Agencies and Tribes support our plan in 2007

2007 Fish Spill & Tests

➤ **Rocky Reach**

→ Spring Spill: **No spill (first time since 1980's)**

→ Summer spill: **9% from June – August**

➤ **Rock Island**

→ Spring Spill: **10% April 17 - May 31**

→ Summer Spill: **20% June 1 – August**

Rocky Reach: Spill Percentage Tests by Year

Early Spring / Late Spring / Summer

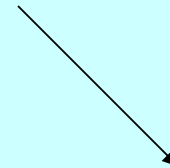

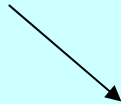

2003
15/25/15

2004
0/24/9

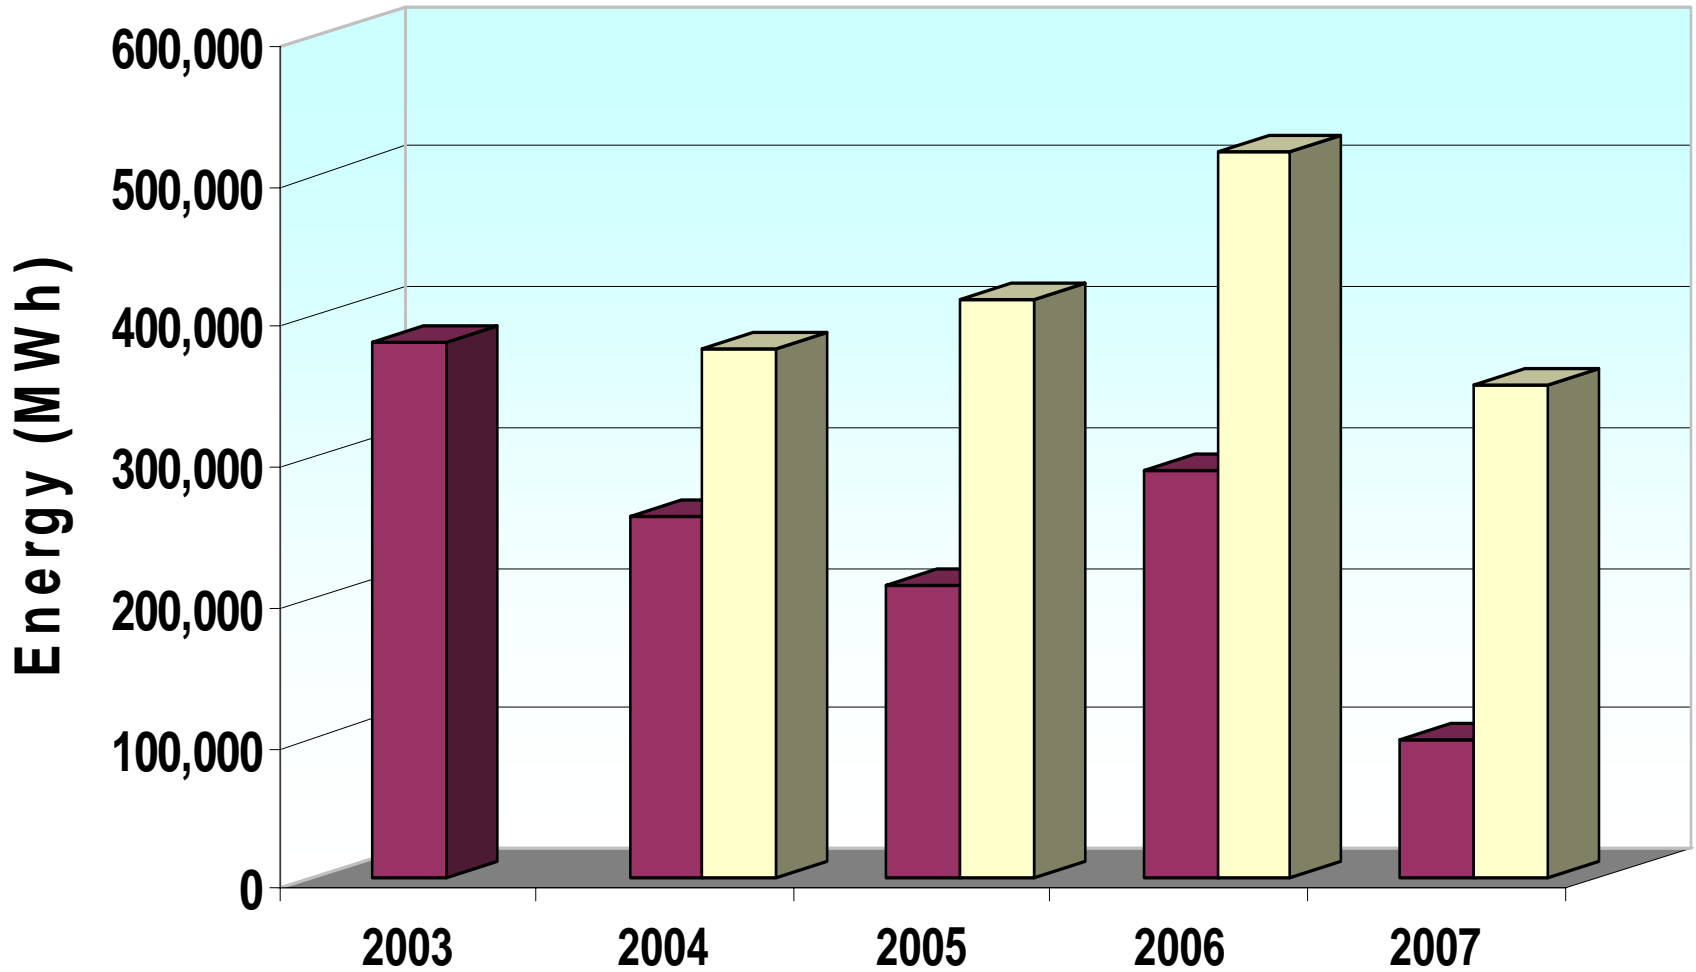

2005
0/15/9

2006
0/15/9

2007
0/0/9

Rocky Reach Spill Reductions

■ Actual Spill Energy Loss (MWh)

□ Energy Loss w/ No Reduction (MWh)

Year

2007

- Spill test year at Rocky Reach and Rock Island
- We will be back to discuss study results later this year
