What this project is:
Project includes trenching and installation of underground electrical conduit and cable in the area of Gaspar Street in Wenatchee.
Phase I: includes excavation, conduit installation, vault placement and road restoration.
Phase II: includes installation of cable and equipment and energizing of the new electrical system.

What are the benefits:
- Replace and upgrade existing underground electrical facilities
- Reduce restoration time during power outages
- Increase reliability of electrical service to the neighborhood and the affected customers

Project schedules:
Work will begin the week of May 13
Work is expected to be completed in mid to late June
Working hours are generally from 7:30 AM to 3:30 PM
Work days are Monday through Friday

Things to keep in mind:
- Periodic lane closure are expected where through traffic and parking may be temporarily diverted.
- Scheduled power outages are anticipated during equipment replacement and cable installation.
- Excavation equipment and power tools will be used on this project.
- Sub contractors Rayfield Bros. Excavation and M.O.E. Asphalt will be performing some work for the PUD
