WHAT:
Chelan County PUD is replacing and upgrading underground electrical lines in the area of Orchard and Marie streets in Wenatchee. The first phase of work will include conduit installation by PUD contractor, Trenchless. The second phase of work will include installation of a sidewalk vault, one transformer, and new underground electrical cables connecting to existing transformers by the PUD.

WHY:
The upgrades are necessary to replace direct buried underground cables that continue to fail. The new underground cables will reduce restoration time during power outages and increase reliability.

POWER OUTAGES:
- Planned, short-duration power outages may be needed during construction
- You will be notified ahead of time about the schedule and duration of the outage affecting your service

SCHEDULE:
- Preliminary work started the week of Sept. 30
- Construction work begins the week of Oct. 7 and is scheduled to last 2-3 weeks
- On-site construction hours are generally 7:30 a.m. to 3:30 p.m. Monday through Friday

THINGS TO KEEP IN MIND:
- Work will start at the southwest corner of Western and Orchard avenues and continue west, on the south side of Orchard Avenue to the sidewalk on the east side of 133 Second St.
- Large excavation equipment will be present during the first phase of work
