What the project is:
The current electrical system, running between Chapel and Paton Streets in Cashmere, requires updating which includes replacement of cables and transformers. The existing cable, which is buried directly in the ground, will be replaced with a new cable in conduit system. The existing transformers will be replaced and will be installed on new fiberglass sleeves. Existing electrical service will be transferred to the new transformer. The project includes directional boring, trenching, and installation of underground electrical conduit, cable, and transformers.

What are the benefits:
- Replaces deteriorating, existing, underground electrical facilities
- Reduces restoration time during power outages

Project schedules:
- Work will begin the week of July 8
- Work is expected to be completed in late July
- Working hours are generally from 7:30am to 3:30pm
- Working days are Monday through Friday

Things to keep in mind:
- Excavation and power tools will be used
- Sub-contractors by the name of Trenchless will be performing some work for the PUD
- It will be necessary for PUD personnel to enter your backyard to access the electrical equipment within the utility easement

Equipment used:
