Subject: Budget for Erik Schoen Stipend

Chelan PUD Grad
Support 2007-0...

Hi Jeff,

To follow up on the LCFE meeting last month, I've attached a budget that breaks down the funds for just covering Erik's stipend over the next 12 months. As I recall, it was easier for you to use a Chelan PUD-UW payment agreement expedite funds for just grad student support to refine important elements of the food web modeling analysis (e.g., incorporate population & size structure info for predators and prey).

As requested, we'll develop separate budgets for:

1. Genetic analysis of unidentifiable fish prey in diets of lake trout 2. Development of a visual foraging model for lake trout and Chinook with application to Lake Chelan.

I'll be out through next Thursday, but hope this info will stimulate activity to ensure that Erik's stipend is secure for another 12 months as the first priority. In my absence, you can correspond with Verna regarding budget and contract administration questions, or Erik for technical issues. Thanks Jeff!

Best regards,
Dave
