

Rock Island Roadmap

2007 – 2009

- As of 2006, survival targets were met using 20% spill
- Agreed to a 3 year plan to test spill level needed to meet survival standards
- If 2007 Chinook targets are met, we will do 2-3 years testing 10% spill for survival - Chinook, sockeye, steelhead
- 2008 will tag Chinook, sockeye and steelhead
- The Statement of Agreement outlines all potential scenarios if survival standards are not met in any of the test years
