To: Kris Pomianek, Public Utility District No. 1 of Chelan County

From: Jon Cofrancesco, FERC

Re: Final Plans for the Rocky Reach Trail for the Rocky Reach Hydroelectric Project (FERC No. 2145-102) filed February 26, 2013

On April 8, 2013, Mr. Cofrancesco contacted Mr. Pomianek to obtain clarification on the final trail plans. Mr. Cofrancesco asked specific questions about the filing. In response, Ms. Pomianek provided the following clarifying information:

The trail section for the project would extend from Lincoln Rock State Park to a point below the Rocky Reach dam and outside the project switchyard. The Public Utility District No. 1 of Chelan County is responsible for operation and maintenance of the trail section within the project boundary. Mileage signs and benches would be provided along the trail route within the project boundary. At the project boundary line, the trail would then connect to a section of a trail located outside the project on Washington Department of Transportation property where it will lead to a planned overlook well below the fish bypass pipe. The trail section outside the boundary and the overlook would be operated and maintained by the Washington State Parks Department and is not part of the project. This section would be constructed at the same time as the trail section within the boundary. There will be no interpretive signage for the trail within the project boundary. The overlook would serve as the primary interpretive display.

Mr. Cofrancesco also reminded Ms. Pomianek that no construction of the trail section within the project boundary should begin without prior authorization from the Commission's Portland Regional Office pursuant to article 302 of the license.
