Subject: Revised Implementation Monitoring Report Schedule, Article 408 and Appendix E

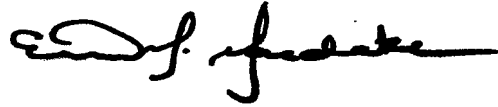

Dear Ms. Smith:

This acknowledges receipt of your revised Implementation Monitoring Report schedule, filed May 4, 2010, under license Article 408(e) and Appendix E of the November 6, 2006 Order on Offer of Settlement and Issuing New License for the Lake Chelan Hydroelectric Project (FERC No. 637).

The Condition U of Appendix E requires you to file, with the Commission and National Marine Fisheries Service (NMFS), a monitoring report within 120 days of project completion describing the success in meeting the Reasonable and Prudent Measures, and associated terms and conditions of NMFS' biological opinion related to the improvements of the Reach 4 stream channel and installation of the low level outlet at the dam. Your notification states that final acceptance of the construction activities was executed on April 19, 2010, which formalizes the completion of all construction activities. Based on the April 19 final construction completion date, you plan to file the referenced monitoring report with the Commission and NMFS within 120 days as required by Appendix E or by August 17, 2010.

Thank you for your notification. If you have any questions, please contact me at (503) 552-2716 or via email at erich.gaedeke@ferc.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "E. Gaedeke", written in a cursive style.
