Chelan Falls Powerhouse Park – Bank Stabilization
District Bid 18-01_Final Acceptance Resolution
Upstream water isolation & turbidity control proposed modification, due to unstable riverbed base at steep slope area. _GR 8/20/18_

- Area of tight contours & unstable riverbed base
- Fish seine, followed by turbidity curtain, approx. 80°
- Optional temporary bulk bag enclosure to allow later turbidity curtain deployment, in area of unstable riverbed.
- Bulk Bags up to last approx. 80°, due to unstable soils.
- Intermediate turbidity curtain(s) to separate work areas.
