Vegetation Management

Area prior to tree/brush removal

Old Mill Park

Vegetation Management

Tree removal at Old Mill Park in Manson coming soon

WHAT

A Chelan County PUD contractor will remove a section of trees at Old Mill Park in Manson that have become hazardous and difficult to maintain. Crews will leave as many healthy trees as possible while also clearing out underbrush as needed to make the area safer and more manageable. The PUD will reevaluate the area and plant more appropriate trees next year.

WHEN & WHAT TO EXPECT

- Tree removal is expected to happen before the end of the year
- The PUD will reevaluate the area in the spring to determine if more work is needed
- More appropriate trees will then be planted
- We will communicate with you again next year before more is scheduled
