### Stehekin Stakeholder Feedback

Jenna Rahm

Informational only, no decision required

## Background

 Chelan PUD staff published an Online Open House in September 2020

 Open house goal was to present the Draft Peak Generation & Energy Resource Plan for public comment

 19 public comments were received, 22 residential meters and five commercial meters.

# Respondent Occupancy Status

#### **Themes**

- Support the PUD's planning efforts
- Supportive of the battery proposal
- Most support assessing tiered rate structure
- Split evenly on fuel switching
- Interested in having more data and information to manage energy use

### Themes continued

 Generally unsupportive of increasing hydro capability as its very expensive

 Most support slowing growth, though most knew the PUD is not the governing body

Some were supportive of a moratorium
