Re: Lake Chelan Hydroelectric Project No. 637 (Project)
License Article 405a - Hourly and Daily Average Flow Data 3rd
Quarter Reports

Dear Chelan River Fishery Forum and Other Parties:
This email is to provide you, in the attached files, with the written flow information for the 3rd Quarter 2021. These reports contains data for surface elevations at the Chelan Dam Forebay and Powerhouse Tailrace and flows from the Powerhouse, Low Level Outlet, Spillway, Pump Station, and Total Reach 4 flows.
This information will be posted to the Chelan County PUD external website under "River Flows, Water Temperatures and Total Dissolved Gas" (link below).

<https://www.chelanpud.org/parks-and-recreation/river-flows-and-water-temperatures>

Data during times of maintenance or calibration events have been denoted with “NA” to designate these periods when data was either unavailable or inaccurate. Noteworthy events are explained below.

- On July 8th there was a water surface ramping rate deviation. The deviation report for this event was sent to FERC and the CRFF on August 9, 2021. Please refer to emails from Bill Towey to CRFF members on August 9th and October 21st for further detail.
- On July 30th two hourly readings from the spill flow were corrected to represent actual spill volume. Bulkheads were placed in front of gate 5 to perform alarm testing. During this testing the gate was opened, and while computer readings depict spill flow, there was no actual spill due to the placement of the bulkhead.
- Two hourly readings were corrected on August 4th to represent actual spill volume. Bulkheads were in place during spill gate “dry” testing. During this testing the gate was opened, and while computer readings depict spill flow, there was no actual spill due to the placement of the bulkheads.
- Spill gate “wet” testing on August 4th resulted in one hourly flow measurement at the dam outside the ramping rate guidelines. This event did not cause a discernable change in water levels in Reach 4 or an exceedance of the 2-inch ramping rate due to the short duration of the gate testing (<2 min. per gate).

Please feel free to call or email any questions or concerns.

Scott Hopkins

Fisheries Biologist II
