Re: Lake Chelan Hydroelectric Project No. 637 (Project)
License Article 405a - Hourly and Daily Average Flow Data 3rd
Quarter Reports

Dear Chelan River Fishery Forum and Other Parties:

This email is to provide you, in the attached files, with the written flow information for the 3rd Quarter 2020. These reports contains data for surface elevations at the Chelan Dam Forebay and Powerhouse Tailrace and flows from the Powerhouse, Low Level Outlet, Spillway, Pump Station, and Total Reach 4 flows.

This information will be posted to the Chelan County PUD external website under "River Flows, Water Temperatures and Total Dissolved Gas" (link below).
<https://www.chelanpud.org/parks-and-recreation/river-flows-and-water-temperatures>

Data during times of maintenance or calibration events have been denoted with "NA" to designate these periods when data was either unavailable or inaccurate. Noteworthy events are explained below.

- On July 10th spill was moved from the Low Level Outlet (LLO) over to the spill gates to perform maintenance on the LLO gates. Four hourly readings on the spillway gates were below 200cfs but within the equipment range of bias. Spill will be set at 205cfs in the future.
- On July 20th spill was reduced to facilitate a rescue of six individuals that had trespassed into the Chelan River gorge despite posted warning signs. Emergency services were contacted, response protocols implemented rapidly, and spill was reduced for about three hours allowing the rescue to be performed without exceeding license minimum or maximum lake level elevations. Ramping rates were exceeded due to this rescue and all necessary reporting has been completed.

Please feel free to call or email any questions or concerns.

Scott Hopkins

Fisheries Biologist II
Chelan County P.U.D.
