**Subject:** <External> **Connected March and April**

Steve I wanted to comment on your article in the recent "Connected" March/April 2018. I have been very concerned about the bitcoin businesses coming into our valley. I thank you for addressing this issue. I am worried about the amount of power these businesses use. I would like to see our power protected from businesses using a great deal of our power with no way of providing more jobs in our community. In my opinion I would like to see those who work at bringing more businesses to our valley look at how many jobs these businesses will offer in our community. I think about the Alcoa plant sitting idle and hope the power from that plant could be saved and used for a manufacturing company who would come in and revamp the huge plant into something that could bring jobs to our valley.

I appreciate you taking the time to read my e-mail and again appreciate your help in making sure our power is used to the best advantage of all the people in our valley not a few but the many who live here.

Sincerely  
Marilyn Lancaster  
Monitor, WA
